

# GUNNERS WILL PLAY IN FINAL ROUND SATURDAY NIGHT

On Saturday evening at 8:15 the winner of the Lonsdale-Brown series will play on Gleichen for the first game of the final for the championship of the province. Another record crowd should be on hand to witness this game and arrangements will be made to handle it with dispatch.

The Gunners have now moved up into the final round of the playoffs series by defeating Canmore last Friday night 2-0 or 3-1 for the round. The game was played before the greatest crowd ever attended a hockey game in Gleichen, numbering 1000 people. Thus the new rink justified its existence and accumulated the crowd easily, in fact about 400 more could have been seated.

Going to the mid-weeker the game did not start until 9 o'clock, in order to give the ice a chance to tighten up. From the face of it, the game was a close one, but the business of playing hockey. The going was tough, the puck hard to control and end and rush was very slow. At the four minute mark a time out was called and seeing that the defense would check him, shot from the blue line and dived in headlong. The rebound which never came, for the puck had found the net. The crowd left off a lot of steam then. Maynard got through and tested the bars with one, Nelson did the same a little later. Most shots from Canmore boys came from the blue line for the defense could not get through the Gleichen defense. Gleichen had a lot of the period, as Canmore on very few occasions got beyond mid ice.

The second game was faster than the first and somewhat tighter up. Both teams were making end to end rushes. Canmore got through on two occasions but Roberts was on to the job and saved. The Gunners also got through a couple of times but failed to register, also they hit a couple of other splendid chances to score. The periods were evenly divided. Both teams showed signs of fatigue from the tough going. There were no scores and no penalties, the score still standing 1-0 for the Gunners.

In the third game Canmore threw everything they had into the game endeavoring to score. They sent every man by bar and made things interesting around the Gleichen net. The Gunners thereupon played defensive hockey but ever on the alert for an opening rush down the ice and finally it came but three minutes before the final bell. Someone lifted the puck about half way down the ice and Camp Brown dived after it, picking it up as it neared for the net with the whole Canmore team after him, and having only the goalie to beat who was several feet out in front of his net, shot the puck between Riva's legs into the net, which the crowd thoroughly approved. There were no penalties.

## THE TEAMS

Canmore—Riva, Blochman, Shandrick, Cheneau, Sandrick, Lopuschko, Cornier, Gilewski, Nuckie, Hubman.

Gleichen—Brown; Johnston, Maynard, Nelson, T. Brown, Simpson, Referee—H. Murphy, Calgary.

## SUMMARY

First period—1, Gleichen, Camp Brown; 4-0. Penalties: Blochman and Lopuschko, Canmore.

Second period—No score and no penalties.

Third period—2, Gleichen, Camp Brown; 17-0. No penalties.

## NOTES OF THE GAME

That the Gunners were out to win the game is shown by the fact that they received no penalties. All of which goes to show that if the opponents play the game the Gunners do likewise.

In the last game Canmore won on the last play of the game and they might have scored an additional goal.

# REGULAR SESSION BOARD OF TRADE RECENTLY HELD

At the last session of the Board of Trade held in Duff's Coffee Shop there was a good turnout of members and much business was discussed.

President Percell occupied the chair. The minutes of the annual meeting were read and on motion of Messrs. Michael and Dufco were adopted as read. The membership committee reported 21 paid members with 19 prospective new members joining.

The horticulture committee was appointed with Messrs. Yates, Boyd, Lester, and Kelly as members of same. The motion it was decided that the committee await next meeting for discussion.

The anti-camp committee will also be appointed at the next meeting with the executive acting in the meantime.

L. Michael suggested that the two men be appointed week about a service.

The secretary was instructed to ask the town council for protection of the basement lots of the old Palace Hotel, particularly pertaining to the tourists, articles pertaining to children.

Messrs. Zimmerman, Halstead, and Lester were appointed The Planning Committee and were asked to meet in a room at the next meeting with a \$10 appropriation in view as well as a \$15 plan.

A. F. MacCallum was appointed Boy Scout representative on the Board of Trade replacing Rev. J. R. Davis who has moved away.

Messrs. Zimmerman, Goodenham, and Evans were re-appointed the public relations committee.

Mr. Michael and R. W. Harris, are to set up Industrial Committee.

The entertainment committee was re-elected in its full state namely Messrs. Harrison, Pineau, McKay, Michael, Haskins.

The Canadian cheer committee is composed of A. F. MacCallum, J. Black and J. F. Gorril, while while C. T. R. Bell committee consists of Messrs. Phillips and Lester.

Geo. H. Goodenham was appointed speaker for the next meeting. J. F. Gorril brought up the subject of a library to be opened under the auspices of the Board of Trade, which was readily approved of and a committee of three was appointed: J. F. Gorril, V. M. Gilbert and J. Boyd.

The executive was instructed to interview the Athletic Club with regard to the July 1934 Anniversary celebration.

At the close of business part of the meeting Adj. Sutherland gave a talk on Russian as he found it when these some years ago he was of his landing in Vladivostok, Manchuria, the city of Harbin and the country throughout. The Trans-Siberian railroad, different cities in Russian as he found them when there in war time.

In the first period when Canmore was short a man on two separate occasions. The Gunners sent four men by bar and Canmore was left with a grossly hampered play. At the end of the ice was good.

It is needless to say that the Athletic Club and the Hockey Club were delighted to have such a big crowd on hand. Preparations have been made to handle a crowd of this size and to avoid the rush in selling tickets at the rink, an advance sale took place down town, also two tables were put into use at the rink with this arrangement the crowd was handled in quick time and by half past eight all were seated. It might also be added the side door to the rink was used to let people in and those who had bought tickets at the advance sale used this entrance.

The Gunners now enter into the last round for the Championship of the Province of Alberta and may they come out on top. If they do come out on top the boys may see some thing of the neighboring provinces in the playoffs for the championship of Western Canada.

Natural red dye has been produced from a species of cactus by a German chemist.

# News Items of Local Interest

L. Woods of Drenthel, spent the weekend in town visiting his parents, Mr. and Mrs. Eli coles.

Chas. Betts states that he has been instructed to summon all car owners found driving a car without 1933 license plates after March 1st.

The election Saturday for councillors for the Blackfoot municipality resulted in the return of the councillors whose terms had expired this year, namely Messrs. Bolinger, Wheatley and Nelson.

Alton school has received the diploma for having made the greatest number of points in school fair work. Some of the sewing was taken by the judges to be shown elsewhere. Dorothy McBean and D. Oliver were both successful in winning a short course at the Old School of Agriculture.

Mild weather prevailed for several days at the end of last week. Sunday the strongest chinook that has blown this winter struck taking off all the little snow that remained and stirring much dust. Late Sunday afternoon a small wind snowstorm puffed up and since then the weather has been cooler.

Recently a crib tournament took place in the Legion hall between teams composed of Meadowbrook and Gleichen players. Meadowbrook won the tournament by 3-0 game. The return match will be played at A. N. McLeay's residence Thursday evening. The following players played in the last game: Meadowbrook: J. McArthur, A. McLean, S. Hall, T. Burne, A. Wilson, W. McKeever and G. Bell. Gleichen: E. Haskins, Col. Lewis, W. Cook, F. Johnston, J. Ostrander, J. Robinson and I. Gove.

Saturday evening a surprise party was sprung on Mr. and Mrs. John Koefied at their farm home north east of town. The evening was spent in playing cards which resulted in Mrs. Bishman, Mr. E. Mrs. Koefied and Mr. R. Koefied being declared winners. Among those who attended the party were: Mr. and Mrs. J. Koefied, Mr. and Mrs. R. Koefied, Mr. and Mrs. Payne, Mr. and Mrs. Eford and Mary, Mr. and Mrs. Day and family, Mr. and

## OBITUARY

MRS. W. A. REID

After a lengthy illness Mrs. W. A. Reid died in the Bassano hospital, at the age of 32 years. She was born at Roston, Manitoba and was married to Mr. Reid Oct. 5th, 1921 at Roston. Accompanied by her husband she moved to Clary in 1924, leaving there they went to the Peace River where they lived for a short time, finally coming to Gleichen in 1928 where with her family she has resided ever since.

Her husband she leaves two sons, Donald T. and Jackie B. her father, Mr. John Reidy, who has resided here since last summer; four brothers, Harold of Dorn, Man. R. E. of Bield, Man., Welland of Virden, Man., and Ernest of Cereal, Alta. The last named attended the funeral. Mr. Reidy, her husband, of course, was at the funeral and close friends in the persons of Mr. and Mrs. A. Maurer of Bassano and Mr. and Mrs. G. Gould of Bassano were present at the funeral. At 10 o'clock Wednesday afternoon the funeral took place from the nited Church, Gleichen, which was filled with sorrowing friends. Rev. V. M. Gilbert conducting the services. The pall bearers were Messrs. J. Egglese, R. Harrison, J. Greer, W. Palmer, R. Kelly and S. Proctor. Interment taking place in the Gleichen cemetery with G. W. Evans in charge.

## CARD OF THANKS

Mr. W. A. Reid and family, also Mrs. Reid's father, John Reidy, wish to thank their many friends of Gleichen and surrounding district for their kindly assistance and sympathy in the time of their great sorrow and bereavement, also for the many beautiful floral gifts.

## DASHES FROM CRAIGANTLER AND DISTRICT

Jim Ramago accompanied Miss C. Marwick to Calgary to see the Bronks and Niners play.

Bill Smith is in his usual health again. Bill says he has been so tied up this winter amongst his cows that he contracted mild fever.

Bill Jensen is planning on growing from nine to ten acres of spuds again this year. Bill and Henry Dackworth planted about nine acres last year but were a little late in planting and most of them got frozen.

There is great regret in this district through the death of Otis Tiede. Otis was only 13 years old but was a manly boy and liked by everyone. The funeral was largely attended, the service being held in the Strathmore nited Church. Rev. W. H. Wering pastor of Mount Calvary Lutheran Church, Calgary, conducted the service.

## SENIOR YOUNG YOUNG PEOPLE'S SOCIETY MEETING

The Senior Young Peoples Group held their semi-monthly meeting on February 14 in the I. O. O. F. hall.

Mr. McArthur and Donald, Mr. and Mrs. Etheridge, Mr. and Mrs. Bushman and family, Mr. and Mrs. C. Roush, Mr. and Mrs. Calkins and family, Mr. and Mrs. McLeay and Roy, Mr. and Mrs. Cook, Mr. and Mrs. McKeever, Mrs. and Miss Oliver, Mrs. W. Smith, Walter Biddle and W. E. Brooks.

In an effort to assist school districts, municipalities and other public bodies to improve the surroundings of a choice public buildings and community centres, the provincial government will commence this spring the free distribution of a surplus of nearly three million caragana seedlings from the provincial forestry plantations at Oliver near Edmonton. Distribution will also be made to farmers and other individuals who apply for supplies. The seedlings will be shipped out, on application, in bundles of 50 and 100, and the only expense for the applicant will be the cost of express and other carrying charges from Oliver. It is suggested that the caragana may be secured by school boards and municipalities for beautifying school grounds, public parks, picnic grounds, cemeteries, the surroundings of public buildings, churches, etc. In this connection, an unseasoned seedling age, the government is also in a position to supply a certain number of young spruce and pine trees from the stocks developed at Oliver plantation. Already a number of applications have been received by the provincial forest service branch for supplies of these young trees. Under the policy, announced some time ago for their distribution, they will be made available not only to public bodies for beautification of public grounds, but also to individual farmers who have wooded bluffs already established on their farms, and who are ready to aid in the work of re-establishing coniferous growth in the farming areas by securing these trees from the Oliver plantation and planting them in their poplar bluffs. While the policy, announced some time ago for their distribution, they will be made available not only to public bodies for beautification of public grounds, but also to individual farmers who have wooded bluffs already established on their farms, and who are ready to aid in the work of re-establishing coniferous growth in the farming areas by securing these trees from the Oliver plantation and planting them in their poplar bluffs. While the policy, announced some time ago for their distribution, they will be made available not only to public bodies for beautification of public grounds, but also to individual farmers who have wooded bluffs already established on their farms, and who are ready to aid in the work of re-establishing coniferous growth in the farming areas by securing these trees from the Oliver plantation and planting them in their poplar bluffs.

Several new members were present. In the previous meeting North Downey, president handed in her resignation, while Clowes Phillips, treasurer and Margaret Desjardins, social convener also resigned. Their respective positions have been taken by Bob Cardinal, Max Yates and Hilson Desjardins.

It was decided that new officers should be elected every three months. The play is progressing favorably and will probably be ready on or about March 10th.

All the members were in favor of purchasing some supplies needed in the kitchen. After the business part of the meeting was completed, the rest of the evening was spent at games and dancing. Supper was served and dancing continued until midnight.

## BROWNLEE TURNS DOWN TARIFF JOB

Definite information has come to hand that Hon. J. E. Brownlee, premier of Alberta has been offered a position on the tariff board and has declined. This information was not made public by the premier but we believe the public are entitled to the facts.

Premier Bennett wants the best possible on this board and is willing to pay. The salary was set at \$12,000 per year for ten years with a \$6,000 retiring allowance for life at the end of that time. Considering the premier is now receiving around \$10,000 after the general wage cut, together with hundreds of grief, we feel a lot of honor in the fact that Mr. Brownlee for staying with his people.

This is not the first time that Mr. Brownlee has turned down alluring offers. A private organization last year offered him a very attractive proposition and also the Canadian Wheat Pool had a \$20,000 offer in front of him for two years.

It will also be remembered that H. W. Wood years ago was offered a cabinet position in the Dominion Government by Premier R. L. Borden, and also the premiership of the province in 1921 but refused both to stay with \$20,000 president's job. In addition to this while holding the dual position as chairman of the Wheat Board and president of the U. F. A. he, for five years refused to take salary from U. F. A.

We also have definite knowledge that Robert Gardiner, M. P. was strongly pressed to accept the chairmanship of the Grain Commission which carries a salary of \$1,600 for ten years, but he also refused.

These are examples we seldom hear about in public life and we feel quite sure if we had more like them, the "Ship of State" would not be floundering as it is today. This proves that there are still some men who put personal gain second and not first.

## STRENGTH SHOWN BY SUN LIFE

In a year when business statements are, on the whole, far from cheering the published experience of life insurance companies has been a most encouraging one. While other industries have too often proved disappointing, every policy held in our life insurance companies is still worth one hundred cents in the dollar, with substantial additions in accumulating dividends.

The steady flow of insurance funds into protective industry is one of the greatest mainstays of business today. But few realize the extent of this financial support in the case of individuals. Payments to policyholders and their dependents during the year, for instance, by the Sun Life of Canada, whose statement appears in another column, climbed to over \$10,000,000. A portion of this represents money that the assured could obtain, only on the value of their policies to meet the special exigencies of a distressing period.

These and other conditions during the past three or four years have subjected life insurance companies to a most exacting test. The war and the influenza epidemic, by abnormally increasing mortalities, produced a situation against which human foresight could scarcely provide. The (Continued on last page)

## The War Debt

A Spectre Which Is Threatening the Very Existence Of the World

Mr. R. D. Blumfeldt, for the past 40 years a leading journalist in London, recently delivered a broadcast address to the people of the United States, in the course of which he said:

"As an Anglo-American, born and brought up in the Middle West, and then living for the past 40 years in England, with a deep and abiding love for the land of my birth and equal ties of affection with the country from which I am now speaking and to which I owe so much, I may be presumed to understand something of the psychology of the people of both countries.

"Your hatreds are great, but remember that Britain, in carrying the War burden, has been taxing herself almost to suffocation point. Your War sacrifices were heavy; your contributions not inconsiderable; your over-exercising taxation proves the measure of your burdens. All that is recognized and appreciated by England, whose hatreds are even greater than those of any nation. Measure for measure England has poured out her very life blood during and since the War, standing foursquare against world domination which would otherwise have come. But she cannot stand alone much longer. This England hopes that a way out may yet be found by making sacrifices all around. Peace and prosperity are to be had if it is determined to have it so.

"This debt question has come to a point when it shows itself in its full nakedness of misery and destruction, a spectre which threatens the future of the world. It must be met, and only Britain and America, working side by side, can accomplish it.

"Otherwise Europe and after the whole of civilization may well disintegrate in a welter of barbarism. The United States also stepped in to save civilization. Will she allow it to crash now?"

## Business By Barter

Carrying On Trade Without the Use of Cash or Money

Barter has become "the business" in Utah, doing a daily business of as high as \$6,000 without the use of a cent in real money, by an organization with 10,000 members and branches reaching into California, Arizona and southern Idaho.

In size and volume of operations, the National Development Association, as it is known, takes second rank in the west to the barter exchange system of Los Angeles county.

## Issuing Cuddie Stamps

The United States Post Office Department has ordered the Bureau of Engraving and Printing to prepare die for a 3-cent postage stamp in memory of Calvin Coolidge. The stamp, it was learned, probably will be black and similar to the one issued when Premier Harding died. It is expected, like the William Penn stamp issued last October, to have no border.

A magistrate says you can't drive a car with your arm around a girl's waist. How little he knows.

Saccharine is 500 times as sweet as sugar.

## When Your Daughter Comes to Womanhood

Give Her Lydia E. Pinkham's Vegetable Compound

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound. It will regulate her system and keep her healthy and happy for many months. Teach her how to guard her health at this critical time. When she is a happy, healthy wife and mother she will thank you.

W. N. U. 1978

## Fishing Territories Of Dominion Extended

Hitherto Barren Waters In Rockies Swarm With Trout

Canada's efforts in the conservation of wild life and game fish have brought back the trout to its former haunts, have saved the antelope, muskox and other animals from extermination and have returned the salmon to its natural spawning rivers on the Pacific coast from which it had disappeared. Alan N. Longstaff, of the press department, Canadian National Railways, told the Progress committee of Montreal at their luncheon meeting in the Windsor Hotel.

"Now those efforts have also been turned to the propagation of game fish in hitherto barren waters in the Canadian Rockies and their fishery territories of the Dominion," he declared.

The enthusiasm of a Russian emigrant for the waters of Jasper National Park, after his visit there, was largely responsible for the tests being made by the biological service, which led to the planting of speckled trout fry in the waters of Medicine Lake. Young fish, planted there in 1927 had grown so rapidly and had become so numerous that in 1932 the National Parks Department had opened the waters of Medicine and Medicine Lakes and the Maligne River to sportsmen, who were able to catch the speckled trout of from three to five pounds from waters which five years before had been found absolutely barren of fish life.

## To Be Called For

Many Strange Things Are Left In A London Storehouse

A London repository which has its storerooms beside the Thames has the world's strangest collection of goods. In one room there is an electric brougham which has been in the repository for over thirty years. It has a special kind of steering wheel, and was left there by an old lady while these carriages were still in fashion. Why she keeps it still is one of the mysteries which are to be found in every room.

Some people use it for storing their cars. There are machines of every type, shape and make, some of which have been there for over ten years.

Others, who have no wine cellars, store their wine there. When they need some they come to the cellar, and take away two or three bottles.

A special room is reserved for storing musical instruments. It is kept day and night at a temperature of 60 degrees.

The repository will move goods left in its charge to any part of the globe. The furniture of President Hoover, who lived for many years in London, was moved across the Atlantic in this way.

And upon one occasion, an \$8,000 (steam) motor was chartered to carry the furniture of an entire hotel to Bermuda.

## Wants British Settlers

Says Northern Saskatchewan Can Support Million More People

The small farmer, working a quarter section in northern Saskatchewan, was in a prosperous condition and quite prepared to welcome any of the depression as anyone else, stated R. H. Horner, Blaine Lake, Sask., in an interview at Montreal.

"There are hundreds of small farmers, and I believe it to be the general rule, who have lived carefully on their 160 or 320 acres, in a very independent position today," he said.

"I am sorry to hear of the objection to bringing people out to the prairie province on the grounds that they are taking the bread out of the farmers' mouths. I believe that the statement is untrue. I suggest that a million more people easily and I would like to see an arrangement made between the British government and the Canadian government whereby those who live in England today might be brought out here, given land and the debt continued to them until they had established themselves. Canada's population is ever growing, some day we are going to need more wheat, some day again we are going to sell more wheat, and the rehabilitation in Canada of people who have been in the crowded to hold would be, in my opinion, a benefit to both countries," Mr. Horner said.

## The Metric System

Now a Common Conversion Factor Between the English Inch and Millimeter

The "inch" is safe for posterity. The agitation which has been in progress looking to abandonment of the English system of measurement based upon that unit, in favor of the metric system, is at an end. And as a consequence, the billions of dollars which the changeover would have cost will now be saved.

All this results from the recent adoption almost universally of a common conversion factor between the English inch and the metric millimeter. Hereafter, so far as the industries of the United States and Great Britain, France, Germany and other countries where the metric system is official, the inch equals 25.4 millimeters.

How all this was accomplished is told in the current issue of the "Industries of World First Universal Federation for Fine Measurements." Between the United States, Canada, Great Britain and other countries using linear measure based on the inch, and those using the metric system, a need has long existed for the adoption of a factor of a similar factor which should be uniform and controlling among industrial concerns.

On October 21 last year, at a conference of delegates under auspices of the American Standards Association in New York City, "25.4" was formally approved as the conversion factor between inch and millimeter for industrial use in this country.

Now that common agreement has made 25.4 a universal conversion factor, among industrial concerns, it is possible, particularly for those whose business is international, to use blue prints in either inch or metric system, and with equal accuracy. Dimensions can be controlled readily. An automobile can be built in France using metric measurement standards, yet conform exactly to dimensions of a similar car built in America under gauges based on inch measure.

## Well Known Sayings

Some Which Have Been Credited To Wrong People

A newspaper writer recently spoke of Barman as having said "you can't fool all the people," it was not Barman, but Abraham Lincoln who said it, and what he said was: "You can fool some of the people all the time, and all of the people some of the time, but you can't fool all the people all the time." Barman could have said that, but what he did say was that "there's one born every minute," which is a very different kind of statement. Another writer spoke of a witty Frenchman who said as regards the abolition of capital punishment, "Let the assassins begin." If Napoleon was a witty Frenchman, the statement is correct enough for it was he who said it.—Toronto Daily Star.

## Offers Cow For Those Services

The latest barter deal came from a North Duchesne farmer, near Havelock, Ont., who offered the treasurer of the local telephone company the choice of two of his cows for six months' telephone service. The treasurer, not wishing the job of looking after the cows, refused the offer.

## Soured On THE WORLD?—THAT'S LIVER Wake up your Liver

Many people who feel sour, sluggish and out of sorts, are suffering from a liver that is not working properly. The liver is the largest organ in the body and it is responsible for the health of the whole system. If it is not working properly, the whole system will suffer. Wake up your liver by taking a course of treatment with a liver tonic. This will help to cleanse the liver and restore it to its normal state of health. You will feel better and your health will improve.

## Has Exciting Job

Life Of Quack Doctor Detective Full Of Thrills

The wealthiest man in Detroit today has had as much of a life as the poorest man in the village. He has been in the city eight—includes the Scandinavians—and spots before the eyes in practically every district.

He is Otto Fischel, who speaks several languages, and it is his business to be selling. Never a day passes that he doesn't have something. His last "hit" has been a 63 different medicines to treat—only he didn't take any.

The man of many maladies is a special investigator for the City Board of Health, and it is his job to uncover medical quacks and charlatans who practice in Detroit. He is so called because he is in perfect health, and because he takes a little like a man about to be stricken with practically everything.

Fischel's job isn't a pleasant one, and often it is in disguise, and always he has a symptom, sometimes many symptoms. He buys a sample of the medicine prescribed, testifies to the method of treatment offered, and starts on another case.

Recently he visited the office of a foreign-speaking "doctor," disguising himself as a factory laborer. In his best Bohemian, he listed an array of symptoms, and gave a foreign name.

The "doctor" asked him to lie on an examining table. Then, deliberately, he drew from his surgical case a long, thin knife. He leaned over his patient.

"Do you happen to know a fellow by the name of Otto Fischel?" he asked, quietly moving the knife closer to Fischel's chest.

No, said Fischel, his heart turning a handspike.

The "doctor" abruptly walked across the room and stood for several minutes beside a window.

"Hey, Fischel," he called.

The trembling patient made no move. Finally the man strode to his door.

"You know what?" he said, grinning. "I thought for a minute you were Otto Fischel, the detective. And you know what? If you had answered as I would have, you'd have cured out your heart."

Fischel completed his case and left in a hurry.

## Lesson Has Been Costly

Canadian Borrowers Should Protect Themselves Against Exchange

Canadian borrowers may, of course, learn some lessons from the present rate experience. Some of these were referred to in "The Financial Post" some time ago. One of the lessons was urged that Canadian cities, provinces and corporations should never again make their securities payable in anything but the lawful money of Canada; that they should, if necessary, pay a slightly higher borrowing rate in order to protect themselves against the vagaries and absurdities of exchange rates. At Canadian cities and governments and our larger corporations adhered firmly to such a policy and were supported by Canadian banks and investment bankers, foreign buyers of our securities would in time forget about New York and London payments entirely.

Canada has benefited from the investment of foreign capital but a great deal of this capital has been obtained at much too high an ultimate cost. We would have been better off without it.—Financial Post.

## Everyone To His Taste

An Indian up in Northern Michigan, near Marquette, has been buying half-dozen bottles of cough syrup.

Chemist: "Someone ill at your house?"

Chemist: "No."

Chemist: "What sort on earth is all this cough syrup for?"

Indian: "M'm-m-hum on pan-cakes."

## Rabbits Eat Good

At an account of 40 dancing rabbits at the headquarters of the Labor Act violator. Attracted by the extraordinary antics of the bunnies, adorned morality officers investigated and found a large supply of someone in the rabbit hutch.

Maggies Attack Turkeys

"Plover" magazines are telling poultry farms in New Zealand. Entire broods of turkeys have been destroyed at Okapi. Near Mountbatten a number of turkeys were killed by the plover brood, and despite the fierce battle put up by the mother, they carried off a dozen chicks.

## The Earth's Interior

Many Theories Advanced As To Composition Of Core Of This Planet

Professor Reginald A. Daly's review at the meeting of the Geological Society of America at Cambridge still leaves the most reliable information on the mystery under our feet to be supplied by the chemist, rather than the geologist, seismologist or astronomer. Of direct evidence concerning the inside of the earth we have none and can expect none except to the enthusiasts of scientific fiction a mine or bore hole 4,000 miles deep is unthinkable. There remain the evidences of travel of earthquakes waves through the earth's core, the fact that this core undoubtedly is several times heavier than it would be if composed of rock, the proofs of the earth's changes in the shape of the earth's elastic crust and a few other macellaneous facts from which any theory of the earth's interior must be deduced.

Even the fact that the innermost part of the planet is a great ball of iron, not enough to be noticed, but kept rigid by the enormous pressure of the material above it, is a fact that the fact which are pitifully few. The idea of an iron ball explains the exact density of the earth's interior, and it is suggestive that, so many materials are of iron, implying that this metal is common in the universe, but these are about the only definite facts that the iron core theory can be deduced.

Chemistry's attack on the problem begins at the other end. It is probable, the cosmic chemists say, that the earth originated from material pulled out of the sun. If so, this problem probably had about the composition of the sun's present outermost layers, where iron certainly is plentiful. On another hand, the assumptions the mass composition of this original earth-stuff can be computed. This, it is possible to deduce from firm chemical laws, just as the elements and combinations of elements would find condense to liquid out of the mixed mass of white hot gases; accordingly which elements would form the central nucleus of the earth ball destined to grow into the planet. Theory indicates that this first condensate from the primordial would be liquid iron, which is no definite fact contradicts this deduction it probably forms, as Professor Daly said, about as good a working hypothesis as any.—New York Herald-Tribune.

## Aids To Beauty

Sale Of Toilet Articles Does Not Fall Off During the Depression

Whatever the state of business may be, it appears that the sale of toilet preparations does not fall off. It is evident from a report just issued by the Canadian Government Bureau of Statistics on the Toilet Preparations Industry for 1931 that the ladies of the Dominion did not, in their buying, apply any reduction to the value of the output of the industry in 1931 was \$5,644,246 as compared with \$4,206,000 in 1930. The gain, however, is not so great as it appears. The output value for the industry, was due chiefly to the transfer of several large concerns from other industries and should not be taken as an indication of increased production by the companies in this group. On a comparative basis, the rate of production in 1931 was about the same as in 1930. Of the total of \$5,644,246, tooth pastes and powders accounted for \$1,598,349, the largest single item in the whole of which the male section of the population perhaps use as much as the ladies, but the following items cannot be charged, except fractionally, to the men: creams of all kinds, \$95,746; face powders, \$734,635; perfumes, \$674,774; talcum powder, \$319,217; toilet waters and lotions, \$447,837; Florida water and so forth, \$323,287; compact (powders) and rouges, \$288,655; lipsticks, \$94,452; brilliants, . . . \$1,922; sachet powders, \$2,769.

In the year under review there were a total of 56 factories in this industry of which 34 were in Ontario; 13 in Quebec; two in Manitoba; one in Alberta, and two in British Columbia.

Essentially, the larger Canadian output caused a decrease in the imports from \$1,267,599 in 1930 to \$1,112,635 in 1931.

Joe—What he you thinka' of, Janet?

Janet—Notin' much.

Joe—Why notin' yeh thinkin' of me?

Janet—I were.

London's latest dance is the Charleston.

Some ghouls reach a height of 37 feet.

## Get Rid of That Stuffy Head!

Any little soreness in the throat grows rapidly worse if neglected. Crush some tablets of Aspirin in some water, and gargle at once. This gives you instant relief, and reduces danger from infection. One good gargle and you can feel safe. If all soreness is not gone promptly, repeat. There's usually a cold with the sore throat, so take two tablets to throw off your cold, headache, stiffness or other cold symptoms. Aspirin relieves neuritis, neuralgia, too. Use it freely; it does not hurt the heart.

## Then and Now

Changed Attitude Of Americans Towards the War Debt

When, in 1913, on the invitation of our Foreign Office and an American committee, Sir George Adair Smith went to the United States to speak on the "Moral Aspects of the Debt," he had to address in April, along with Mr. Taft, a meeting in Cleveland, Ohio, before the Chamber of Commerce, and attended by over 700 men of business and the professions. Mr. Taft, who was not then in office, said in the course of his address: "I hear that our Government is lending very large sums of money to Great Britain. As an American citizen I trust that we will never sell back a single cent of it. Because for three years Great Britain has been standing between us and the monster."

This was loudly cheered by the whole meeting.—British Weekly.

## Little Helps For This Week

"I'd Lord will hold thy right hand, saying unto thee, 'Fear not, I will help thee.'—Isaiah 41:13.

"Show Thy marvelous loving kindness, O Thou that savest by Thy right hand all who put their trust in Thee."—Psalms 37:7.

If we could see beyond today, As God can see, If all the clouds should roll away, The shadows flee, O'er present griefs we would not fret, For many joys are waiting yet, For you and me.

Do not look forward to what may happen tomorrow; the same ever-loving Father who cares for you today will take care of you tomorrow and every day. Either He will shield you from suffering or He will give you unfailing strength to bear it. Be at peace then, and put aside all anxious thoughts and imaginations.

## THE RHYMING OPTICIST

By ALICE MACHONIE

THE ASTRONOMER

He deals with whirling stars and suns And outlines realms of space and time. With that unerring light that runs His never-ending line. The universe before him spins In ordered, vast array As with many little stars and suns Unhindered, far away. He dwells apart, so rapit he Is tracing that design Which shows through all infinity. Unhindered and benign He gazes at the stars that gleam God's purpose in the waste. Which you and I have only seen Within the human soul.

## Freedom From Gossip

Would Set Communities On Road To Happiness and Success

Had we power to give the average city or town one gift, this New Year's season, we would give it freedom from gossip, says an editorial in the Bolestonian Magazine. That gift would mean more for human happiness in homes and community than a million-dollar factory or a bumper wheel crop in a dollar market.

Gossip, plain devil-tongued talking about other people, is an outstanding social curse of our day. More homes are wrecked by gossip than are ruined, more careers are downcast, more banks are closed by the careless repetition of gossamer rumors, scandalous half-truths and lies than by any other one cause.

Any community which substitutes true neighborliness for gossip, sincerity, helpfulness and friendship for deluging is on a good, smooth road to happiness and success.

## Mid-Atlantic Air Station

The Berlin Tageblatt announces the practical completion of the liner "Westfalen," which has been reconstructed for use as a floating air station in mid-Atlantic to facilitate air mail service between Europe and America. The ship will be given triple speed at which time catapult and drag sail tests will be made.

## New Zealand Crop

Record Wheat Crop Is Forecast By Wheat Purchase Board

A record wheat crop of more than 10,000,000 bushels which will include an exportable surplus of 2,300,000 bushels, is forecast by the New Zealand Purchase Board.

The local price to the growers is fixed at three shillings and four pence, f.o.b. (80 cents at par), with the possibility of further payments later from the compulsory wheat pool. The pool is designed to maintain the average value of wheat based on the New Zealand home consumption value at 31 shillings and pence a bushel (\$1.04 at par) and the probable export value of half a crown (60 cents at par).

## Set Record For Safety

It seems to be fairly safe to travel in Pullman cars. The company announced that in 1932 it carried more than 15 million passengers for about seven billion miles without a fatal accident.

In all Great Britain there is only one woman test-taster.

## Town & District

Mr. and Mrs. Walter McKay entertained the Garners at their home Friday night after the game.

The jig-saw puzzle is giving employment, not only to some people who have time on their hands, but to some engaged in making them. Some concerns are reported to be running 24 hours a day turning out the puzzles in quantities to supply the demand.

A very successful bridge party and dance was held in the I.O.O.F. hall Tuesday night under the auspices of the Senior Group of Young People. There were about fifty people present. The prizes were awarded as follows: Ladies first, Miss M. Crowe, ladies consolation, Miss M. McBean, Gentlemen's first, Mr. L. G. Gower, gentlemen's consolation, Mr. W. Serrano. A delightful lunch was served at midnight and dancing lasted till about 2 a.m.

Born to Mr. and Mrs. J. L. Nason of Standard, a girl on Tuesday, January 31.

The many friends of Jim McGary who came here with Lord Beresford in 1902 with cattle from Mexico and is known by all old timers throughout the country, is confined to the Essau hospital from an operation on an injured foot. We hope to see him around soon to "sock one."

The Gleichen local U.F.W.A. met at the home of Mrs. R. P. Umbreit with 17 members and two visitors present. The usual routine business was carried on. A good paper by Mrs. Felix Desjardine on the "Great Canadian Sculpture, Walter Allard," was read by Mrs. J. A. McKeown. Mrs. Desjardine was unable to be present. Mrs. J. Hutchinson, Mrs. McLevell, Mrs. McArthur and Miss Godwin served a very tasty lunch. The ladies were invited into the meeting of the U. F. A., at the same home, to hear a paper on "Technocracy," given by Mr. H. H. Ellis.

Joan McLean who secured the highest standing in school subjects in the Gleichen school fair, has received a valuable set of seven leather bound books from the Department of Education.

The Deerfoot Club journeyed to Strathmore one night last week and played a 5-6 draw with the Strathmore Juniors. In the exciting play of 10 minutes each side scored one goal. It was an exceptionally fast game all the way through and was very close, only three penalties being handed out. Alex Lewis is the new manager of the Deerfoot club.

After the hockey game Friday night a good crowd attended the dance at the Meschewick hall, including the entire Gleichen hockey team. The Camrose boys had the time of their lives and hope to come this way again sometime.

Defending his wife's divorce suit an Alberta man testified she allowed him only a nickel a week for spending money.

When a 67 year old Alberta woman was elected from her home more than a hundred cats were found running about the property. No doubt some of the aged lady's stray cats drifted into Gleichen as shown by the amount of cat-scratching that goes on in the middle of the night in certain parts of the town.

1933 is the fourth year of the depression; this occasion the inquiry how long our other great depressions lasted in acute form before the dust-tan came. The real turn in the depression following 1907 came in 1912 nearly four years following the panic. The revival from the depression following 1913 came in 1917, which was the fourth year of the reactionary period. After the panic of 1873, the sequel to which in many respects resembled the hard times these days, four years elapsed before there was a up. It is questioned whether the latter and that period was followed by another year of slow and uncertain recuperation. Some of the subsequent depressions were dated back afterwards to specific events: after 1873 to the resumption of gold payments in the United States; after 1893 to the defeat of the campaign for a depreciated currency in 1896. Other recoveries came only through gradual resumption of normal business. That may be the story of this present depression.

## STRENGTH SHOWN

financial catastrophe by which they were so closely followed created conditions that only the strongest institutions could withstand.

Yet, during the three years in question, the business of the Sun Life Company increased by nearly 400,000,000 dollars and its assets by forty-three million dollars. The number of its policyholders increased during that period, by over two hundred thousand and now amounts to nearly a million. This resilience under abnormal strain is both amazing and reassuring to the man in the street.

One explanation of the ability of an insurance company to meet all its obligations under such trying conditions is that its obligations are so scientifically estimated that it is able to provide for all expenditures out of ordinary revenue. To a rescuer, it is unnecessary to dispose of assets during a period of distress. It makes the fluctuation of security prices a matter of no special concern. The report of the Sun Life refers to the fact that the total of its assets in force, nearly \$3,000,000,000, will be payable during the present generation. If to this huge sum be added the amount payable during the many years by other insurance companies the wholesome effect upon the economic and social situation in the coming years can scarcely be overestimated.

## The Gleichen Flour Mill

Now is a good time to get a supply of flour for next summer. Flour milled within the next two or three months will be at its best two or four months later. In the meantime you will have the bran and shorts for the horses, milk cows and pigs during the winter months when they most need this class of food.

The Gleichen Flour Mill would prefer to have its patrons pay for the grinding and take all that the wheat makes but will exchange either flour, bran or shorts for wheat at prevailing prices.

The telegraph will reach your man quickly. If you are sure just where he is the telephone will do it quicker. But if it is good help you want and do not know just where to find it, our Want Ads are quicker than either.

## Sun Life Assurance Company of Canada

INCORPORATED 1865

HEAD OFFICE - MONTREAL

THE inherent strength of life assurance has been tested and proved during the past three years of general business recession, and the invaluable service it renders the public in times of emergency fully demonstrated.

THE Sun Life of Canada, during this period—probably the most trying in human experience—has maintained its record of progress, and has been of especial service to its great body of policyholders throughout the world.

ITS assurances in force have increased since 1929 by \$465,000,000; assets by \$43,000,000. Its policyholders now number nearly a million.

### STATEMENT for 1932

TOTAL ASSURANCES IN FORCE, December 31, 1932	\$2,928,952,000
This large amount, the accumulating reserve of nearly a million Sun Life policyholders, will become payable to them or their dependents during this generation—a stabilizing factor of great social and economic value.	
NEW ASSURANCES PAID FOR	284,958,000
TOTAL INCOME	151,467,000
TOTAL DISBURSEMENTS	148,026,000
EXCESS OF INCOME OVER DISBURSEMENTS	13,331,000
PAYMENTS TO POLICYHOLDERS AND BENEFICIARIES:	
During the year 1932	108,327,000
Since Organization	702,712,000
ASSETS	611,436,000
Assets: government, municipal, public utility and others; stocks; preferred and common; loans on mortgages; real estate; loans on Company policies; cash in banks and other assets.	
LIABILITIES	597,241,000
Assets nine-tenths of this sum represents the policy reserve—the amount set aside to guarantee all policy payments as they become due.	
PAID-UP CAPITAL (\$2,000,000) and balance at credit of shareholders' account	\$3,416,000
RESERVE for depreciation in mortgages and real estate	4,781,000
SURPLUS	5,998,000
	\$14,195,000

The valuation of assets has been made on the basis prescribed for all companies by the Insurance Department of the Dominion of Canada. Policy reserves have been valued by the full net level premium method, on bases more exacting than those required by the Insurance Act of the Dominion of Canada.

Applications for new assurances were received by the Company during 1932 at an average rate of more than \$1,000,000 for every working day.

During 1932 the Company paid to policyholders and beneficiaries more than \$509,000 for every working day.

Income from renewal premiums was the largest ever received by the Company in a single year.

Cash in repayment or reduction of policy loans exceeded in amount that of any previous year. Revivals of lapsed policies were in excess of those of any previous year, with one exception.

The net amount of policy proceeds left with the Company at interest was substantially increased.

## Sun Life Assurance Company of Canada
